

PRODUCT PROFILE

Easy Cut 1000

Description:

*If **protecting products** is your #1 concern, this is the box cutter for you!*

Ideal for opening single, double, and triple-wall boxes, Easy-Cut 1000 offers a patented radius-blunt tip blade and multiple depth settings to cleanly slice through cardboard boxes without causing damage to product inside – even something as delicate as a balloon! A gentle squeeze of the ergonomic handle extends the blade naturally, reducing repetitive thumb motion injury common with other box cutters. When the handle is released, the blade retracts inside the unit, unlike other devices where the blade remains in an extended position waiting for an accident to occur. An edge guide enables left and right handed users to make quick, accurate top cuts – sliding back into locked position when the cut is complete. The unique snap-on lanyard and holster with 180-degree rotation ensure easy reach and secure placement on a belt loop – reducing injury and down time looking for lost cutters. The on-board storage compartment for back-up blades enables fast and convenient blade changes.

Tech Specs:

| | |
|--------------------|--|
| Use: | Opening/cutting boxes |
| Materials: | 97% nylon, 3% glass fiber |
| Mechanism: | Carbon Steel (spring) heat treated |
